

DRUMOPENER

Trouble-free emptying and completely application with the pneumatic drum opener from APE Engineering. Also the usage of the completely emptying and cleaned drums as a robust dustbin in the fabrication or as an accumulation bin for components and assemblies are possible.

Comfortable operating mode

Connect the drum opener to compressed air and handle the drum opener easily onto the bordure of the drum.
Open the pressure valve and the cutter automatically carve into the drum and opened it completely.
The drum opener slices directly inside of the bordure. Also we deliver the drumopener for the cut sideways.
